SECOND SCIENTIFIC MEETING

World Society for Pediatric & Congenital Heart Surgery
at the
Fifth World Congress of Pediatric Cardiology & Cardiac Surgery

Dear Colleagues and Friends,

The World Society for Pediatric and Congenital Heart Surgery is holding its Second Scientific Meeting on June 22-24 in Cairns, Australia. This meeting will take place during the 5th World Congress of Pediatric Cardiology and Cardiac Surgery and is in fact an important part of the World Congress. The World Congress organizers and the World Society Program Committee have worked hard in a spirit of mutual respect and cooperation to put together an exciting program. There will be a comprehensive Postgraduate Course on the topic of "Common Atrioventricular Junction" which will be dedicated to the memory of Sir Brian Barrat-Boyes of New Zealand. In addition there will be 32 oral presentations of the best abstracts submitted. The "Stella Van Praagh Lecture" will be delivered by Robert H. Anderson and the "Aldo R.C. Castañeda Lecture" will be given by Roger B.B. Mee.

The World Society for Pediatric and Congenital Heart Surgery was established in 2006 and held the Inaugural Scientific Meeting in Washington, D.C. in May 2007, which was a great success. In 2008 the World Society organized a historic World Summit on Pediatric and Congenital Heart Surgery Services, Education and Cardiac Care for Children and Adults with Congenital Heart Disease in Montreal during which the multi-specialty Global Organization for Pediatric and Congenital Heart Disease was established.

The Vision of the World Society is that every child born anywhere in the world with a congenital heart defect should have access to appropriate medical and surgical care. Its Mission is to promote the highest quality comprehensive care to all patients with pediatric and/or congenital heart disease, from the fetus to the adult, regardless of the patient's economic means, with emphasis on excellence in education, research and community service.

We therefore invite you to attend the Second Scientific Meeting of the World Society for Pediatric and Congenital Heart Surgery, at the 5th World Congress of Pediatric Cardiology and Cardiac Surgery in Cairns, Australia and become an active member of the global coalition to improve care and education for children and adults with congenital heart disease.
